EB2800i • EG2800i GENERATORS SAFETY RECALL — STOP SALE/RENTAL NOTICE

Dear Honda Power Equipment Dealer,

American Honda is issuing a Stop Sale Notice for certain EB2800i and EG2800i generators.

Due to a manufacturing defect, the carburetor float bowl may not be installed correctly, and can leak fuel. If gasoline or gasoline vapors leak, a fire or explosion could occur.

A fuel leak caused by this manufacturing defect is typically noticed by a strong smell of fuel before, during, or after operation, or if fuel is seen leaking underneath the generator. Generators that exhibit any of these symptoms are usually new units with low hours of run time.

Affected Units

Model	Start Serial Number	End Serial Number
EB2800i	EAAA-1000037	EAAA-1015421
EG2800i	EABA-2000047	EABA-2020152

American Honda Inventory: Currently all affected American Honda inventory is on hold.

Units in Dealer Inventory: Tag these units and place them in a secure location to prevent retail sale. We have attached a printout showing non-registered units within the affected ranges that have been purchased from American Honda. Units within the affected serial number ranges cannot be sold or otherwise placed into service until they have been inspected and, if needed, repaired, as required by law. If a dealer sells an uninspected/unrepaired unit after being notified of this safety recall and stop sale notice, any injury or damage that occurs is the responsibility of the dealer.

Retailed Units: Affected customers will be notified after release of the service bulletin.

Replacement Parts: Replacement parts will be available with the release of the service bulletin. American Honda individual carburetor float bowl and O-ring parts inventory is unaffected.

American Honda will be issuing a service bulletin with detailed inspection and repair instructions in the near future. We apologize in advance for any inconvenience this issue may cause.

If you have any questions, please contact your Honda District Sales Manager or District Service Manager.

Sincerely,
Honda Power Equipment Division
