HSI NYLON

TYPE 1 (TC) TRIANGLE SLING

Slings have a triangle and choker fitting on either end. This is most commonly used in a choker hitch, but can also be used in basket.

TYPE 2 (TC) TRIANGLE SLING

Slings have a triangle fitting on each end. Type 2 slings are more economical than Type 1. They are normally used in a basket hitch, can be used in a vertical hitch, but they cannot be used in a choker hitch.

TYPE 3 (EE) EYE AND EYE SLING

Flat Eye slings are very popular slings that can be used in all three types of hitches. They are easy to remove from beneath the load after the load is in place. Unless Type 4 is requested, Type 3 will be supplied as the standard EE sling.

TYPE 4 (EE) TWISTED EYE AND EYE SLING

Twisted Eye slings are similar to Type 3 except the eyes are turned 90 degrees to form a better choker hitch. This type of eye also nests together better when used in a basket hitch.

TYPE 5 (EN) ENDLESS SLING

Endless slings are very economical. They can be used in all three types of hitches and wear points can be moved to increase sling life. The sling legs can be spread for improved load balance.

TYPE 6 (RE) REVERSED EYE NYLON SLING

[WITH CORDURA WEAR PADS]

Reversed Eye slings have protective webbing over the entire body and eyes. This extra webbing reinforces the sling and protects it from wear, resulting in an exceptionally resilient sling.

ATTACHED EYE WIDE-LIFT SLING

[LIGHT LOADS]

Attached eye wide-lift slings are ideal for lifts that require wider bearing areas and some balance attributes. Eyes are made from separate material- WLA1 is 1-ply, WLA2 is 2-ply- both sewn to the sling body. Body is single ply for both 1 and 2-ply eyes.

CONTINUOUS EYE WIDE-LIFT SLING

[HEAVY LOADS]

Continuous eye wide-lift slings are constructed from one endless sling with the two body lengths butted and joined side-by-side. Stiffener webbing is used at the base of the eyes to deter the body webbing from folding down the middle.

NYLON MONSTER EDGE SLING

Monster Edge nylon slings are produced with a stiffer material that adds reinforcement and durability to the sling's edges. Available in widths of 1in - 4 in, and 6 in.

NYLON BRIDLE SLING

Nylon bridles can be configured with varied leg lengths for the purpose of lifting and handling loads that have fixed lifting lugs or attachment points.

[1] Choose the number of legs required — ***1,2,3 or 4***

[2] Choose the length of legs necessary — ***fully customizable sizing***

[3] Choose the proper connection attachment - ***eye, hook or oblong link***

- Flex head ratcheting wrenches with flex head that tilts up to 180 degrees at any interval
- Reversible ratcheting wrenches with compact reversing lever allows for quick changes without removing ratcheting box end from fastener
- Tri-lobe ergonomic dual material handle Phillips and slotted screwdrivers for optimal balance of strength and comfort
- Precision engineered hex and ball-end hex bit sockets with bits made of S2 steel for added strength and better fastener fit
- Professional assortment of ergonomic dipped grip handle pliers with tongue and groove, slip joint, linesman's, diagonal cutting, and long nose
- 42 in 11-drawer mobile work station offers 19,000 cubic inches of storage capacity and a built-in charging station
- Tools pre-packed in foam storage trays
- Full lifetime warranty on all hand tools and a 5 year warranty on the mobile workstation

STABILA® 25100 TYPE 81SM
Torpedo Spirit Level, 10 in

- Tough cast aluminium profile
- Slender, trapezoidal profile shape for an optimum, easy grip
- Strong rare-earth magnet system for adhesion to metal objects
- Ideally suited for applications in cramped conditions
- Spirit level with one precision-milled measuring surface
- Measuring accuracy in normal position is ± 0.02 in/ft and ± 0.03 in/ft in reverse position

ITEM # 25100-12954

STABILA® 29940 TYPE 80ASM-2
Pro Set Spirit Level Set, 12 in/24 in/48 in

- Comes in three common lengths:12 in, 24 in, and 48 in
- Slim, easy-grip aluminium profile with reinforcing ribs
- Extra-strong rare-earth magnet system for adhesion to metal objects
- Locked vials ensures long-term accuracy
- Firmly seated during marking thanks to integrated slip-stoppers
- Plastic end caps protect the profile against impact
- Two measuring surfaces

ITEM # 29940-12954

STABILA® 39548
IP67 Digital Tech Level

- Electronic spirit level with two digital displays for instant measurement of inclines, slopes and angles
- Optimum protection against dust and water in accordance with IP 67
- Accoustic guidance allows for quick alignment without looking at level
- Calibration free even after falling or exposure to temperature fluctuation
- Long operating time of up to 400 hours
- Keyboard lock to prevent accidental input
- ROOF-PITCH mode (in/ft) to quickly determine the roof pitch

ITEM # 39548-12954

STABILA® 3185 LAX 300G GREENBEAM
Laser Level

- Self-levelling line laser with plumb-line dots
- GREENBEAM technology – with optimum visibility up to 95 ft
- Provides 1 horizontal line, 1 vertical line and plumb-line dots upwards and downwards
- Energy-saving laser diodes enables an operating time of up to 15 hours
- Can be used on the floor, on a tripod, with rare-earth magnets on metallic objects or on the wall bracket
- Laser can be pivoted 360° inside the housing

ITEM # 03185-12954

STABILA® 3420 LAX 600G GREENBEAM
3-Plane 360° Laser Level

- CAS 12V battery-powered, self-leveling line laser with green 3 x 360° lines for precise layout work
- Work on sharp and perfectly visible lines – up to 130 ft away
- Ready for immediate use with fast self-leveling with a pendulum mechanism
- Divide rooms into 4 x 90° with two orthogonal vertical lines
- Vertical plumb line and a horizontal line for exact height transfers
- Sturdy aluminum and glass frames and the shock-absorbing STABILA® soft grip exterior
- CAS 12V Li-Power 2.0 Ah rechargeable battery for up to 15 hours of use
- Quick recharging in 45 minutes

CM® SERIES 622-A Hand Chain Hoist

- Classic round-type, compact design makes hoist ideal for low-headroom applications
- Durable steel frame with heat-treated, load-bearing components for long life: 4:1 design factor
- Load tested to 150% of rated capacity
- Forged hooks swivel 360° and have large throat openings to allow for easier load attachment and positioning
- Stamped steel safety latches ensure secure load attachment and prevent accidental unhooking of the load when the chain is slack
- Reliable, low-maintenance Weston-type braking system stays clean and dry for precise load positioning
- Rolled-edge design ensures smooth movement of hand chain
- Double pawls ensure positive load control in all environments as well as precise load positioning

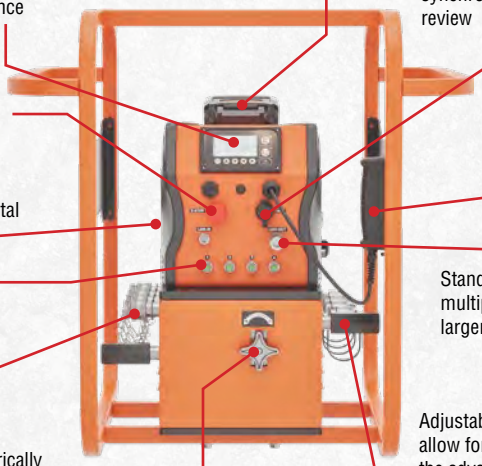
eSYNC

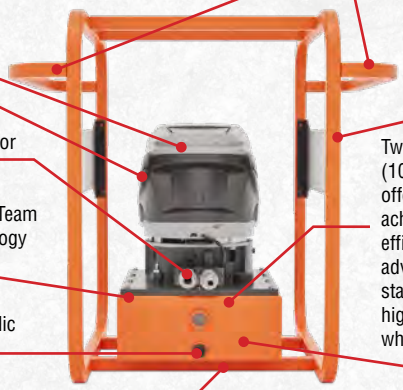
PORTABLE & EXPANDABLE MOTION CONTROL SYSTEM

eSYNC KEY FEATURES



- Interface allows quick access to menus for user inputs and monitoring lift performance
- Cordless 60VDC battery system and 115VAC or 230VAC powered options
- USB for data-logging synchronous lifts for post review
- E-Stop for quick connected pump and valve actuation shutdown in an emergency
- Pendant controls synchronous/ manual toggle, advance/retract, and synchronous stop
- Pressure transducer for digital system pressure readout
- Feedback sensors allow controlling the accuracy between all points within a 1 mm tolerance
- Standard link option for connecting multiple units together creating a larger multi-point eSync system
- Millisecond adjustable electrically controlled valves meter the distribution of oil into the hydraulic circuits for increased accuracy
- Adjustable relief valves allow for user control of the advance and retract fluid pressure
- Load lowering valve controls the descent of a heavy object

PB43 [CORDLESS] & PE60 [CORDED] HYDRAULIC PUMPS



- Available with PB43 (cordless) and PE60 (corded) hydraulic pumps with different power options
- Ergonomic 2-person carrying handle
- Weatherproof pump rating of IPX4
- Lightweight and portable — great performance to weight ratio
- Plug and play manifold for easy hose connection
- Two-stage, high pressure (10k psi) hydraulic pump offers unloading valve that achieves greater pump efficiency with quick tool advancement in the first stage, while shifting to high pressure second stage when demanded
- Industry leading Power Team Vanguard Pump technology
- Easy-access hydraulic fluid drain port
- Protective and stackable uCage comes standard with PE60 or PB43 hydraulic pumps
- Hydraulic oil reservoir with sight gauge
  - PB43 (cordless) 3.0 gal
  - PE60 (corded) 2.5 gal

uCAGE ADDITIONAL FEATURES

- Protective and stackable uCage comes standard for the eSync, storage totes, and hydraulic pump
- Three on-board stackable totes allow protection and storage of position sensors and cables
- Lock-in-place design with secure strap for hassle-free transportation

- Handheld pendant controls the auto and manual functions allowing a remote position for better visual operation with included storage holster
- Pendant controls auto synchronous/manual toggle, advance/ retract, and stop operation for safety situations that require a quick override
- IP55 rated remote with 12 ft cord and large buttons

- Li-ion 60V DC, 8.0 Ah battery with 4 level battery life indicator
- 1.5 Hour battery charge time from drained to full
- Charger available in 115V AC 60 Hz or 230V AC 50 Hz
- Global battery compatible with both charger styles

- The uCage is connected with quick pins, making the setup and breakdown processes hassle-free and eliminating the need for additional tools
- The uCage innovative design is stackable, optimizing storage space, improving eSync screen visibility, and facilitating transport

CROSBY® TURNBUCKLES

- All end fittings are quenched and tempered or normalized allowing for greater durability at all temperatures
- Turnbuckle bodies have UNC threads, while end fittings use a modified UNJ thread — reducing stress at the root of the thread
- Each turnbuckle is heat-treated using Crosby's perfected methods which reduces the risk for catastrophic failure, improving safety on the jobsite
- All components have a high-quality, hot-dip galvanized finish for corrosion resistance and long-term sustainability
- Tested at 1.5x the WLL for a minimum standard of 20,000 cycles — their proof load is 2.5x the WLL, while their ultimate load is 5x the WLL
- Crosby® forges their logo and product identification code (PIC) into each turnbuckle to maintain material control from the steel mill throught the manufacturing process — each turnbuckle component is PIC-coded for full traceability

TWIN-PATH® HEAVY LIFTING SLINGS

Perform heavy lifts with Twin-Path® high-performance synthetic roundslings. Twin-Path® slings are used worldwide in place of steel rigging for heavy lifts.

- The Twin-Path sling design, which has two individual paths of fiber working as one sling
- Srength & Durability: inside every Twin-Path roundsling are load bearing core yarns called K-Spec®, which are 10 times the strength of steel
- Lightweight & Ergonomic design: approximately 10% of the weight of a steel sling
- Easy Repair & Inspection: equipped with the Check-Fast® Inspection System which acts as an External Warning Indicator (EWI)
- Why Twin-Path? — Due to the Twin-Path design, abrasion damage can be easily repaired at **HANES SUPPLY** or any authorized Slingmax manufacturer

ABRASION & CUT RESISTANCE

- The core yarns of every Twin Path sling is protected by our Covermax Cover which is a double layered jacket that is very abrasion resistant as well as UV resistant
- Slingmax® offers a variety of engineered edge, cut and abrasion protection using high-performance synthetic materials

HELIX™ Heavy Lifiting Slings

- **Narrow Width Profile** — Helix™ slings offer high strength capacities while maintaining a narrow profile; ideal when lifitng with narrow hardware or limited space
- **High Strength and Durability** — utilizing K-Spec® core fiber which is extremely durable, strong, and light weight with less that 1% elongation at rated capacity
- **Helix Braided HMPE Sling Cover** — Helix™ slings are equipped with an abrasion and chemical resistant HMPE braided jacket that protects the load bearing core yarn
- **Abrasion and Cut Protection** — Helix™ roundslings offer excellent protection agains cuts and abrasion with additional protection available with Slingmax® engineered edge and cut protection compatability with: CornerMax® Pad, CornerMax® Sleeve and Spider Sleeve

SPIDER SLEEVE Abrasion Protection Sleeves

- **Versatile Configurations** — Available in sliding, fixed, or removable configurations, providing flexibility to suit diverse rigging needs
- **Friction Reduction** — Spider Sleeve minimizes cover friction, allowing the sling's outer cover to glide effortlessly over itself or rough hardware
- **Choker Hitch Protection** — Protects against jacket damage when slings are tightly choked, enhancing the lifespan of your equipment
- **High Performance Material** — Crafted from 100% HMPE fiber, this sleeve is tightly woven to ensure exceptional strength and durability while maintaining an extremely low coefficient of friction
