

IMPORTANT SAFETY NOTICE – STOP SALE

Dear Valued Retail Partner:

The purpose of this letter is to inform you that Generac will be announcing a safety recall of certain GP15000 and GP17500 portable generators. This recall is being undertaken in cooperation with the U.S. Consumer Product Safety Commission and Health Canada.

The recall is being conducted to address a risk that the units may not vent adequately from the rollover valve, causing the gas tank to build excess pressure and expel fuel when opened, posing fire and burn hazards to customers. The affected model numbers are G0057341, G0057342, G0057351, G0057352, 005734R1, 005734R2, 005735R1, and 005735R2.

Generac will be offering customers a free repair kit to install a new rollover valve.

To ensure the safety of your customers, please check your inventory to see if you have any of the affected products specifically called out in this listing. If you happen to locate any affected products, please stop any further retail sales of these specific products, effective immediately. We are in the process of preparing a free repair kit and will reach out to you once that process is complete. If you have any questions in the meantime, or would prefer to return your units, please contact us at 1-888-436-3722 x5688. Please have information about the quantity of units you have on hand.

We regret any inconvenience this may cause to you or your consumers, however we have found it necessary to take these steps to ensure the safety of your customers. Thank you for your cooperation and please contact your Generac Sales Representative if you have any questions.
